

Director Projects at Fibrant

Locatie **Noord-Holland, Amsterdam**
<https://www.advertentie.nl/x-1320295-z>

Would you like to take a leading role in the development of the Project pipeline in our plants, and you further mature the preparation and development of projects? We are currently recruiting for the position of Director LCP & Small Projects. It is Fibrant's ambition to improve and further develop our technology to deliver high-end sustainable solutions to our customers. This has an immediate effect on the way we want to optimize our project standards & processes. For this role, we are looking for a business partner who drives effective decision-making on all levels in the value stream and is able to connect and challenge all stakeholders.

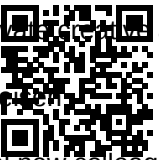

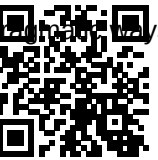

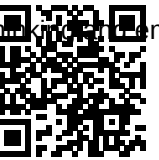

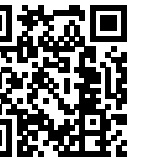

Bedrijfsomschrijving

Working at the cutting edge of technology and people, you'll always have new challenges and new problems to solve, and working together is the only way to do that. You are part of a dynamic plant environment where you collaborate beyond the people in your team. You are passionate about building bridges between different parties in order to connect, enable and challenge all stakeholders.

Functieomschrijving

This role offers you the opportunity to make impact on the improvement of our Program & Portfolio management, in order to deliver the results needed to optimize our business value and our sustainable future. You are able to make the best decisions for Fibrant, even in the continuously changing world we operate. You are experienced in project management and with your (inside out) knowledge you are adding value to Fibrant's Vision 2030.

You challenge the triple constraint as a recognized business partner in order to optimize business value. You provide guidance during the financial forecasting process and proactively assist regular financial management and reporting. We currently have a partner to execute our projects; you will steer that partner and manage the whole project process from conceptual to implementation.
