FREESTYLE/WAVE The Skater is playful and versatile. Its parallel rails and compact planform make it the perfect choice for riders moving from a twin tip to a directional board. Easy to ride upwind, with a very balanced between-the-feet power, the Skater has a cleaner outline with a narrower and thinner tail than previous models, carrying a slight false wing at the back foot. These design features make it easier to ride in strong winds, load the rail in choppy conditions and are super controllable when doing strapless airs.

CNC Cut 15 kg Density EPS = Precision + lightweight
 Lightweight Finish = Lightweight board for better response + higher performance
 High Tensile Fiberglass = Outstanding strength-to-weight ratio
 Strapless Impact Resistance Heel and Rail Patch = Strength + improved load spread
 Double Bamboo Sandwich Deck = Maximum durability + minimizes pressure dents
 Bamboo Laminate = Natural load spread + energetic ex
 Lightweight Fiberglass = Overall lighter board
 Rail Reinforcement Patches = Strengthen the board in key area
 New Deck Pad Texture and Center Heel Bump = Improved
