Goldshell KD6 te koop. Kadena, de coin van de toekomst (mark my words (beter als ETH) Nu nog vroeg, nu instappen voor de next bull run

de juiste tijd om een Kadena miner te kopen, de prijzen zijn gedaald de koers is weer in een stijgende lijn. Zelf heb ik nu voldoende KDA gemined in een jaar om bij stijging naar 5 of 10 of 15 euro te rentenieren

Eventueel samen te koop met een Goldshell KD5 en nieuwe Goldshell KD6, doe een goed bod

---

Voltage Input: 200-285V AC

Operating Temp:0~35 °C

The KD6 Miner from Goldshell mines the incredibly valuable Kadena coin with a maximum hashrate of 29.2 TH/s for a power consumption of 2560W. This latest generation iteration from Goldshell has a significantly improved specification over the outgoing KD5, which provides a lower power consumption ratio and higher hash rate. As the most efficient and top-of-the-range Kadena miner outshining the nearest competition, it provides the highest profitability over any other ASIC on the market as long as KDA holds its.
