

## ChipTuning Ducati Monster 848 1098 1198 Streetfighter (120 EUR)

Locatie **Noord-Holland, Amsterdam**  
<https://www.advertentiax.nl/x-1342006-z>

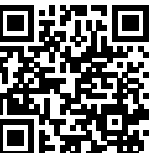

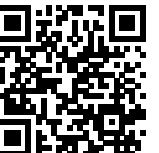

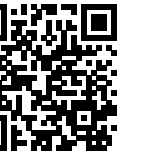

Last van een bokkige Ducati?  
 Zowel de injectie als de ontsteking verbeterd en de Lambda sensor en Exhaust Valve worden uitgeschakeld. Dus geen restricties en beperkingen meer.  
 Het resultaat geeft je een andere motor. Soepeler bij laag toeren en beter oppakken en doorlopen in het hogere toereengebied.

- De voordelen op een rij:
- + meer vermogen en meer koppel
  - + betere gasresponse ook bij laag toeren (minder bokkig)
  - + minder de koppeling erbij moeten pakken in stadsverkeer
  - + een soepeler en vloeiender lopende motorfiets

De volgende settings zijn ook aanpasbaar op verzoek;

- Power Commander mappings rechtstreeks in de ECU programmeren, zonder de Powercommander hardware.
- Immobilizer / startonderbreker aan of uit (zonder extra kosten)
- Lambda sondes aan of uit
- Servoklep / uitlaatklep / Exhaust valve aan of uit
- Display tekst aanpassen

- TPS kalibratie reset / Throttle Position Sensor  
 - Interval / Shift Timing reset  
 - Gearshift Ducati Multistrada waarbinnen de Geargrade reset mogelijk is

|                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                        |
