Greetings!

Here we have a rare example of a good modified Civic EP 3 . It received a new engine on February and by new I mean with 175k on it.

The suspension is lowered but still comfy enough and sharp as hell in the corners. Decently loud exhaust noise , of course modified in a delicate way.

1 month ago I did the distribution belt and accessories, service at the fluids , water pump , good mechanic condition. Compared with the exterior which have some mark of going fast
 VTEC kicks in very well around 4,5-5k rpm

Merci!
