This gateway will connect directly to Wi-Fi so no ethernet cable is required. Install it in the Nedis SmartLife application and connect up to 50 Nedis Zigbee products (ZBxxx) to a single gateway. Each connected product will appear in the Nedis SmartLife application and can be included in automations as if it is directly connected to Wi-Fi.

Zigbee is an alternative protocol to Wi-Fi with low power consumption as the main advantage. This enables small wireless sensors to remain functional up to multiple years on a single battery.
