Ready to go grow kit used for only one grow, with complete 250W HPS lamp lighting and ventilation. Included is a hydroponic AquaPot system which is missing a water reservoir. Various nutrients are also included (grow/bloom, pH Down, bloom booster), with 5 unused CalMag agents of different brands. Can be used to grow a seedling to harvest, with the use of a propagator and other miscellaneous tools. 4 SPLIFF Mega Power Plant seeds are also part of the lot. If you have any questions about setting it up, feel free to ask when picking it up (I live in Nijmegen). See the description of the pictures for a complete list of items.
