Lenovo Yoga 9i (14quot Intel) Dynamische luxe (1.100 EUR)

Hi,

I bought the laptop on June 22, 2021 and have barely used it.

I purchased it after I quitted my job and wanted to combine work together with entertainment. Therefore, I opted for all the top specifications in order to have it for a longer period of time. Added print screens for specifications. (4K display, Intel i7 - 1185G7 with vPro - 4.80 GHz with turboboost, 16GB Ram, 1TB SSD, active pen)

However, after getting a new job, this laptop has been sitting in the closet for almost 10 months. I sometimes use it for netflix and to access my personnel files.

I would say that the laptop looks pretty new. I had no issues with it. Nice and sleek. Also light to carry around. I quite like the leather cover. If you are interested and serious about buying it, feel free to come over and check it out/test it before you buy it.

The brand new version at official lenovo website is listed for EUR2.239 (and 5% discount is available at the moment). I have opted for a premium warranty. It can be extended for extra years (1 extra year would cost eur46)

Update: I receive whatsapp messages from fishers. Therefore, I will not respond to any messages received via whatsapp. If you are interested in this laptop and want to know more, please write via!
