

# Construction Manager Civil

Locatie **Noord-Holland, Amsterdam**  
<https://www.advertentiex.nl/x-1358351-z>

For a chemical multinational located in Antwerp, we are hiring a Construction Manager Civil.

## Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry. We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

## Functieomschrijving

You can join the largest overall construction project undertaken by our client. A world-scale Cracker will be established in the Antwerp area.

The plant is planned to come on-line around 2026. The project will be managed by an Integrated Program Management Team (IPMT). The facilities will be delivered by 4 project delivery teams, which will manage the work scopes and FEED/EPC contractors with support and oversight from the IPMT.

<p>Supervise and coordinate the activities of construction supervisors and engineers within assigned areas. Provide daily supervisory surveillance checks and records, ensuring that contractors' management and supervision are providing safe working conditions and permitting procedures, protective equipment, experienced/qualified supervision and manpower, with reliable, well-maintained equipment to execute the contracted works as per contract schedule and targets. Routinely study, check, review and</p>	<p>discipline supervision work areas, the appropriate equipment, ensure the correct interpretation with the relevant AFCA drawings, quantities and specifications. Ensure proper control of change by issuing and/or change reviewing TQ's and ensure responses are complete and accurate in conjunction with other disciplines. Print and ensure contractor interfaces are both coordinated and planned to allow effective take-over by follow-on</p>	<p>contractors and efficient access to work areas and job faces. Utilise weekly coordination meetings with other discipline superintendents to provide logical progress and target completions as per the contract schedule and daily work plan. Ensure that area/handover documentation is available, and relevant. In conjunction with other discipline superintendents ensure contractor interfaces are both coordinated and planned to provide logical progress and target completions as per the contract schedule and daily work plan. Ensure that contractors survey and accept their work areas and commence contracted works within</p>	<p></p>

schedule time requirements, mobilising supervision, materials and equipment in practical logical sequences. Ensure that contractors working on site have temporary facilities, equipment and hand tools etc. that are fully capable of supporting contractors site needs in the execution of contracted works to meet schedule completions. Agree the extent and location of lay-down and workshop areas, access routes and material receipt, preservation and storage procedures with contractors' management and supervision. Ensure contractors dimensional control methods for checking that all works are properly set out and satisfactory. Supervise specialist surveying contractors when necessary. Ensure all quality control checks and tests are instigated, with records maintained and available as required for concrete mix design, batching operations, concrete pour, foundation release, grouting release, area release etc., all in accordance with contractors' agreed ITP, method statements and project specifications. Where applicable supervise the testing laboratory. Ensure effective control and design of all falseworks, shuttering and formworks. Check that access roads/routes and equipment are in accordance with practical temporary works procedures and calculations. Where necessary, ensure competent technical review of temporary works design etc.
