

IT Infrastructure Lead

Locatie **Noord-Holland, Amsterdam**
<https://www.advertentiex.nl/x-1377940-z>

For our client Fenzi AGT (as a part of Fenzi Group, which is the worldwide leader in chemicals for the glass processing industry), we are currently seeking an experienced Infrastructure Lead to join the IT team. You'll play a key role in building and transforming our global IT Center of Excellence department's future roadmap.

Bedrijfsomschrijving

With headquarters at its Maastricht plant in the Netherlands near the borders with Belgium and Germany, Fenzi AGT Advanced Glass Technologies is considered a quintessential partner in the world of glass, thanks to the superior quality of its vast range of technologies.

The Maastricht factory is a true center of expertise in materials science, operating in tandem with production facilities in the United States, Mexico, Shanghai, and Thailand, and with many other service centers on every continent. A first-class production plant and advanced industrial research laboratory, it engineers high-performance materials for the glass, ceramics, and electronics industries. This multipurpose facility is equipped with the most cutting-edge tools, including client support in developing custom products for special projects.

AGT has a wealth of experience in precious metals and currently designs, develops, and produces a vast range of high-tech products for automotive glass, electronic components, tableware, advanced ceramics, and traditional and technical glass markets. Products like special glass enamels for the automotive industry, conductive silver pastes, inks made with precious metals, ceramic enamels for decoration of architectural glass, home appliances, and hollow glass, all enjoy an outstanding international reputation and set AGT apart as a primary resource for glass manufacturers and processors aiming to produce end products with the finest quality and performance levels. A culture of quality and a quest for excellence has always been part of the Group's history.

Specialists, since day one, in glass decoration with precious metals

[illegible]

You will be supporting the Global IT manager in the planning of and, building up of the IT center of excellence (based in Maastricht) and the future roadmap of this fast-moving IT modernizing and centralization transformation in which a future-proof (cloud-based) global infrastructure environment is the primary focus. Maintainability, cost-effectiveness, and security will be key elements in this.

Maintaining service to users and our global sites is imperative during this process and you will be assisting in managing IT vendors and 3rd parties.

Movie: Experience the Fenzi Group mood

Movie: Fenzi's 80 years of history, always focused on the Future
