

---

Well maintained off road car in a very good condition.

Never has been in an accident.

We own it for 8 years and added a lot of useful modifications:

- rear seats taken out and replaced with a storage
- snorkel
- lifted 2" (springs)
- front and rear still pipes, connected to the frame (for lifting and protection)
- fuel tank, transmission and front steel protection (underneath the car)
- handy arm support with storage
- bigger all-season wheels 235/75 R15
- walkie-talkie car radio (MJ-300)
- big roof storage
- extra lights (didn 't use for a long time, may need maintenance)
- ARB rare wheels blocking with air compressor (didn't use for a long time, need maintenance)

Selling because we don't use it enough anymore.

Damage:

- A dent on the rear door behind the spare wheel.
- The steel net of the roof trunk is torn a bit.
- Shallow scratches on the sides made by trees' branches. They don't rest.

There is additional equipment:

- + 2 tanks (20L) with the attachment kit to keep them on the roof safely.
- + Offroad wheels 235/75 R15
- + Hijack with the equipment to fix it on the roof.
- + Electric winch that can be installed in the front (may need).
