

Samsung Odyssey G5 amp Samsung U28E590D monitors for sale (275 EUR)

Noord-Holland, Amsterdam Locatie https://www.advertentiex.nl/x-1395388-z

I am selling 2 monitors for 275 because I want just one 32 inch monitor now the 2 monitors are

Game in QHD resolution with the 27 inch Samsung Odyssey G5 LC27G55TQWRXEN. With a refresh rate of 144 hertz, this screen displays up to 144 frames per second. This is useful for fast-paced shooters like Call of Duty: Warzone where one frame makes all the difference. Combine this with a low reaction time of 1 millisecond and you always stay one step ahead of your opponents. Set up FreeSync to match the refresh rate to the number of fps your video card produces. This prevents a faltering image. Thanks to the curved, virtually borderless design, you won't have any distractions while gaming.

&

The Samsung U28E590D 4K Monitor is suitable for graphic design thanks to the high resolution and screen technology. A 4k screen is at least four times sharper than a Full HD screen. With a screen diagonal of 71 cm, a 28 inch monitor is one stroke larger than an average 24 inch monitor (61 cm). The TN panel ensures that the display has a fast refresh rate. This monitor has a response time of only 1 ms and is therefore very suitable for fast-moving.
