Hello

I bought this laptop at 25/07/2019 with extended ram to 32 GB and warranty to 3 years. I was thinking that i will play a lot but after couple of months i started to be bored and i was using this device only sometimes, at the end of warranty was replaced whole motherboard at asus service which cost around 700 \$ I'm selling because i don't play so i don't need this device. This beast is working very good. All games run very smooth. This PC have only some scratches because i was moving to different house and it scratched at transport, power supply also have scratches but works perfect. I don't have original box.

I have all documents from buying to.
