JL Audio CP112-W0v3 Single 12" 12W0v3-4 Loaded Ported Enclosure with Gray Carpet Finish
 CP112-W0v3 Enclosed Subwoofer System with Single 12W0v3-4 Subwoofer Driver, Dark Gray Carpet (300 W, 4 ?) - Ported Enclosure

This powerful slot-ported BassWedge™ subwoofer system delivers awesome output at an unsurpassed value.

The slot-port runs along the bottom of the enclosure and fires on the same plane as the woofer to produce excellent extension and response smoothness. The port mouth is flared to minimize air-flow noises.

The ultra-versatile BassWedge™ shape has extended sides so that it can be placed with the woofer firing out or straight down, off the floor of the vehicle. The shape works equally well in forward or rear-firing installations. This gives you plenty of options for tweaking the loading of the enclosure into your vehicle. This subwoofer system is shipped wired, loaded and ready to connect via a push-button terminal. Finish: Dark gray, high-grade automotive carpet with "JL AUDIO" embroidery on the top edge and "Slot-Ported BassWedge™" embroidered on the port mouth.

Ported BassWedge™ embroidered on the port mouth.
