MacBook Pro 2018 spacegrau 15,4" Core i7-8750H, 512GB SSD, 32GB RAM, Radeon 555X

I bought this laptop on 09.04.2019. from Germany refurbished (I have an invoice). It was as new, except for the long line scratch at the bottom of the laptop. Since then it was only used on my table as a home computer connected to the power adapter. Did very little traveling with it.

Only now that I am selling it, I see outlines of the stickers that first owner had at the back of the laptop. Didn't notice them before as it was always open on my table, even when sleeping or shut down. I conclude that it is not really noticeable, but I have to write it here.

Since the beginning I protected the keyboard with a transparent plastic cover protection so zero issues with the keyboard. This plastic can be seen on pictures. Keyboard is QWERTY. I haven't even typed much on it, as I almost always used an external keyboard and a mouse.

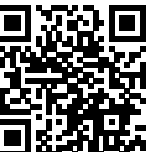

Even though the battery was hardly ever used, it still managed to lose some of its capacity, currently it's at 72% – counting the software capacity reduction to extend battery lifespan. macOS asks for a service and battery replacement. I don't think that is necessary, but if you want a new battery, feel free to replace it.

Newest macOS Ventura is installed, laptop works perfectly. I am selling it because I got a newer model. I have the original hardware, no changes in the hardware.

Original with an original 100W charger included. I am also selling a travel and protective bag. The bag is a black and white color. I bought it, it is a good bag.

reference a pick up in Amsterdam, payment through Tikkie.

SECOND

The MacBook Pro "Core i7" 2.2 15-Inch (Mid-2018 True Tone Display, Touch Bar, Four Thunderbolt 3 Ports) is powered by a 14 nm, 8th Generation "Coffee Lake" 2.2 GHz Intel "Core i7" processor (8750H), with six independent processor "cores" on a single silicon chip, a 9 MB shared level 3 cache, 32 GB of onboard 2400 MHz LPDDR4 SDRAM, and 512 GB of onboard flash storage, and dual graphics processors -- an AMD Radeon Pro 555X with 4 GB of dedicated GDDR5 memory and an integrated Intel UHD Graphics 630 graphics processor that shares memory with the system.

Externally, this notebook has an integrated 720p FaceTime HD webcam, a thin, backlit "third generation" butterfly mechanism keyboard with an integrated "Touch Bar" touch-sensitive control that adapts for different applications and provides Touch ID login support in lieu of traditional function keys, and a gigantic "Force Touch" trackpad.

Additionally, it has a high-resolution LED-backlit 15.4" widescreen 2880x1800 (220 ppi, 500 nits) "Retina" display with True Tone technology, and a integrated battery that provides an Apple estimated 10 hours of runtime.

This MacBook Pro has a secondary "T2" processor for "enhanced security," which includes secure boot and encrypted storage capabilities as well as enhanced image processing.

This notebook has a darker "Space Gray" colored aluminum housing and weighs just a bit more than 4 pounds (1.83 kg).

Connectivity includes 802.11ac Wi-Fi, Bluetooth 5.0, four "Thunderbolt 3" ports (USB-C connector), and a 3.5 mm headphone.
