

BearCreeks iCatcher Baitboat Lithium MEET GPS AUTOPILOT

Locatie **Utrecht, Nieuwegein**
<https://www.advertentieux.nl/x-1421639-z>

Nieuwe stat 110% goed weinig gebruik hij is komplett meet tas
 (Let op hij is zonder stickers die op fotos Stan heb ik weg gedaan hij is weer op originele staat)
 (Met RVS MOTOREN BESCHERMING ZE WAAREN PLASTIC IK HEB RVS OPGEZET EXTRA 70€
 VOOR BETALD)

LITHIUMS ACUUS 2X 20.8AH

iCatcher Pro Baitboat + GPS Autopilot System

The iCatcher Pro from BearCreeks is a baitboat for carp, predator or all-round anglers. Equipped with a GPS autopilot system, 5.8GHZ radio system, two maintenance-free powerful motors and a range of up to 600 metres, you can quickly reach all the hot spots on your lake.

With the GPS autopilot system you can store up to 21 different fishing spots and let the boat automatically drive to the desired spot with an accuracy of +/-21 cm. Of course the system has a "home mode" and always returns safely to the starting point as soon as the signal is too weak or the battery should be empty. The fully microprocessor-controlled electronics allow variable speed settings for forward and reverse travel. A motor trim allows the two motors to be controlled separately and thus to adapt to water currents and wind conditions, which always guarantees a perfect directional stability of the boat.

The iCatcher Pro has a course memory, every station with the exact res. and direction and with a "home mode", manually set by an elaborate selection menu.
 The iCatcher Pro has an electronic magnetic large release hook system for up to 400 grams, which can be divided into a "separating flap", which allows you to quickly create 2 chambers from one feed chamber. Furthermore, the baitboat has an electronic magnetic release hook system at the rear and 7 extra bright LED's, so you can see the boat even at a distance.

With very strong magnets the two covers for the batteries are attached to the upper part of the boat, which guarantees a very fast exchange of the batteries

GPS Autopilot System

21 Save fishing locations

Auto home mode

very stable and impact resistant ABS boats hull

2 powerful motors with algae protection

2 Rechargeable lithium batteries

1 electromagnetic release hook at the rear

7 extra bright LED (3 of them for battery indication)

LED battery indicator with the colours red, yellow and green

electromagnetic feed chamber with 4 kg bait capacity

Range up to 600 m

5 hours running time at maximum speed

Dimensions: 58.5 cm x 37.8 cm x 26 cm

The baitboat is delivered with:

GPS Autopilot System

5.8 GHz radio system

2 Lithium batteries for baitboat

Charging device for the baitboat

Rechargeable 1.2 V batteries with 1500 mAh

Charger for the remote control batteries

Bag for the
