DESCRIPTION

The RSeries is an all-round powerhouse kite, designed to tame any storm, boost massive airs, and master any spot. Due to its high-performance versatility, it quickly became our best selling kite. The aerodynamic delta-hybrid design delivers greatest freeride performance while enabling riders also to chase waves and pop freestyle tricks. This multi-talent is exceptionally efficient, and most riders are content with a quiver of two kites to cover the entire wind range. The construction features a medium to high aspect ratio with a huge angle-of-attack, which gives the RS an extra in grunt, making it particularly powerful. Combined with its dynamic speed, it truly stands out when going for massive airs, which are followed by plenty of hang time. Kite loops come naturally to this wing and generate a thrilling forward momentum. Thanks to the direct feel, the kite's performance is accessible to riders of all levels. It swiftly travels upwind, no matter how gusty the wind or choppy the waters.

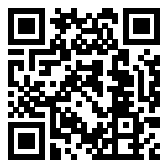

PERFORMANCE FEATURES Three-strut delta-hybrid kite for high-performance freeriding Tailor-made for versatile performance, in all riding styles Designed to cover massive wind range and easy upwind travel Ultra-stable construction, perfect for riding in any condition Precise, fast, and smooth turning characteristics
