After my auto speaker project which was a bit expensive for my budget, I found the right speakers for my ears. Therefore I sell these speakers which were in use for 2-3 weeks and no longer time. They are all working well. All speakers are 16,5cm in diameter. 1. Musway ME6.2C speakers are new. I received them a week ago from the supplier and were in use for about 10 minutes. I do have a crossover for both speakers.

55hz-21000hz, 100w rms, 3 ohm

Nice sound they are giving with good bass.

2. Rockfordfosgate T1650, 75W rms, 4 ohm.

40hz-21000hz. Built tweeter in the middle.

Great condition with a good bass and deep.

3. Kicker CSC67. One side of the membran is repaired on one speaker due to a small break. It doesn't affect the sound as it is on outside membran. The other kicker is excellent.

Absolutely good bass they have.

40hz-22000hz, 100w rms, 4 ohm

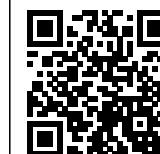

4. Fenton bass speaker (Gratis)

These speakers are 8 ohm, 125w rms.

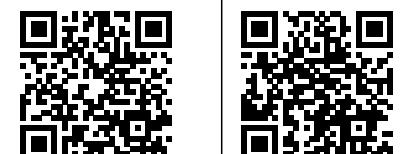

They have punchy bass and deep.

Great condition, 35hz-8000hz

I do have all grilles for all speakers and their box aswell.
