

TIME MACHINES GPS NTP TIME SERVER (TM1000A) (210 EUR)

Locatie **Limburg, Roermond**
<https://www.advertentieX.nl/x-1445734-z>

Een gebruikte TM1000A Time Machines GPS NTP Network Time Server is een eenvoudig te gebruiken GPS gebaseerde tijdserver die accurate tijd levert voor alle computers en tijdregistratie apparaten op het netwerk. Wat je op de foto's ziet is wat je koopt.

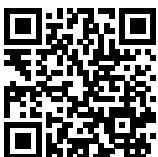

Infomatie van de fabrikant:

The TM1000A Time Machines GPS NTP Network Time Server is a simple to use GPS based time server that will supply accurate time

for all computers and time keeping devices on the network.

By placing a time server on the local network, (S)NTP time packets are provided without requiring systems to go to the Internet to get a Stratum 1 time synchronisation.

The system uses an active GPS antenna to maintain the current time as broadcast by GPS satellites. With this device installed on your local network, there is no longer the worry that if the Internet connection goes down, time synchronisation is lost across the network.. Supports IPv4 and.
