?Apple 85W MagSafe 2 Power Adapter Product Description Is your charger broken or do you need a second charger for work? Then use the 85W MagSafe power adapter. It is equipped with a magnetic DC plug that will disconnect the power cord if it is subjected to too much pressure. This also helps prevent wear or fraying of the cable over time. The magnetic DC connector pulls the plug into the right place for a good connection quickly. Main features of the Apple 85W Magsafe Power Adapter When the plug is properly inserted, the LED on the head of the DC plug lights up; an orange light indicates the mobile device is charging, and a green light means it is fully charged. With this power adapter, you can always charge the lithium polymer battery, whether the computer is off, on or in hibernation mode. Thanks to the handy design of the adapter, you can neatly wrap the DC cable around it. This makes this adapter the perfect travel.
