

Electrical Engineer Senior

Locatie **Zeeland, Terneuzen**
<https://www.advertentiax.nl/x-1452246-z>

For one of our customers we are in search for a Electrical Engineer Senior

Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry. We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

The role:

As Senior Electrical Engineer you will be working on a broad variety of tasks in the field of Electrical Engineering and will be involved from the very first (proposal) phase in the project to perform design proposals and calculations. During the execution of the project, you will work in a team of several engineers in order to deliver the requested engineering deliverables. You will implement deep technical and practical knowledge into solid and innovative designs. As Senior Electrical Engineer you will also contribute to the engineering process by developing the required deliverables, such as specification documents, functional descriptions, schematic drawings and test and validation plans.

Key accountabilities:

As Senior Electrical Engineer, you will be responsible for:

- Performing detailed electrical calculations to define the design and participate in cost checks and to guarantee the required quality. Develop technical and functional specifications and documents to ensure high performance of systems and equipment. Perform cost analysis and offer cost-effective cooperation with the Purchase department. Ensure full compliance to all applicable requirements and specifications, imposed by Class and the customer. Offer support for production and submitting proposals to our customers. Offer technical support for commissioning activities to projects under contract. Manage vendors and subcontractors to get their timely contribution to the project. Contribute to the further development of the E&A Engineering department. Develop and describe standards and working methods.

Funcctie-eisen

Skills & experience

As Senior Electrical Engineer you need to have:

Professional education on Bachelor or Master level in Electrical Engineering or another relevant technical discipline. Minimum of three years experience in the design and installation of complex electrical systems. Experience and broad knowledge of electrical installations, preferably in ships, offshore or industrial installations. Experience with the design of (high voltage) Power Distribution systems. Knowledge about EMC regulations and compliancy precautions. Used to work on Class-regulated products and with Good Engineering Practices, including quality and budget awareness. Experienced to work in complex project environments with and managing third-party vendors and subcontractors. Excellent command of Dutch and English language (written and verbal) is essential and German language skills are preferred. Excellent antecedents as a pre-employment security screening and investigation are a part of the recruitment procedure (given the military nature of the project). EU citizenship or valid EU work visa required to be considered as viable candidate.

Arbeidsvoorwaarden

Longterm, interesting projects, possibility for permanent contract.
