

# Carlinkit Draadloos Carplay en bedraad android auto (40 EUR)

Locatie **Groningen, Scheemda**  
<https://www.advertentiax.nl/x-1456085-z>

Carlinkit Draadloos Carplay en bedraad android auto

Dit kastje werkt alleen op een android auto radio. Als de auto radio geen carplay of android auto heeft kan je dit kastje aansluiten op USB van de radio.  
 Vervolgens kan er met de autokit app op de android radio (verkrijgbaar via site carlinkit) verbinding gemaakt worden met het kastje.  
 Je telefoon verbindt met het kastje en je hebt carplay/android.

|                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                       |
