

Maintenance Field Planner

Locatie **Zeeland, Terneuzen**
<https://www.advertentiax.nl/x-1459688-z>

For a client in Zeeland, we are looking for a Maintenance Field Planner.

Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry. We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

As a Maintenance Field Planner (Mechanical and/or E&I) you will create job packages from the work order scope which contains all the information regarding required labor material and services to ensure safe, effective, and efficient execution of the work. For this role, broad technical skills in analytical/scientific methods or operational processes to perform a defined array of activities is required. You may act as an informal resource for team members with less experience.

What are you going to do?

You use feedback from the person doing the work to optimize the work plans. You review work orders for technical completeness and returns work orders to gatekeeper, if not complete. You carry out field checks, when needed. You prepare job package and inputs plan into SAP indicating the required resources, materials and services. You create and update purchase orders. You identify tasks and times needed to complete the plan, and identify materials and equipment needed to perform the work. You identify the safety information and the elements needed to safely perform the work. You develop the Maintenance Field Planner Use Policy, including all job packages, including a signature or time stamp on the Policy Exemption list before the job package is released. You check that all Maintenance Procedures include a hazard assessment. You serve as a technical resource during procedure creation and review, if needed. Creates, develops, changes, updates job procedures and checklists, and initiate procedure Management of Change (MOC), as required.
