

# All weather motorpak dames - mt38 (295 EUR)

Locatie Zuid-Holland, The Hague  
<https://www.advertentiax.nl/x-1463900-z>

Deze 3-laags, textiele damesjas en broek kunnen aan ieder weertype worden aangepast. Dankzij de uitneembare Raintex membraan is de jas wind- en waterdicht en de uitneembare thermovoering zorgt voor extra warmte tijdens de koude dagen. Zowel in de jas als in de broek! Wanneer de temperaturen het toelaten kunnen de ventilatiepanelen op de borst en rug en de ventilatieritsen op de onderarmen open gezet worden voor extra verkoeling.

De jas is uitgebreid met een rugprotector en een afneembaar reflectievest. Dit pak is maar 2 jaar oud, weinig gedragen en nog in perfecte staat.

Zowel jas als broek zijn mt 38. Broek extra lang zodat deze mooi over de schoenvaalt wat fijn is als je door een regebuï rijdt. Ik ben zelf 1,73cm lang en heb reguliere kledingmaat S. Ik doe dit pak weg omdat ik graag een nieuwe wil aanschaffen.

Nieuw prijs.-

|                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                     |
