

North Orbit 2023 8 Meter Blauw (1.629 EUR)

Locatie **Noord-Holland, De Cocksdorp**
<https://www.advertentiex.nl/x-1466550-z>

Te koop aangeboden:

Ben jij opzoek naar een van de beste big air/kiteloop kites van het moment!?

De North orbit 2023 is in vergelijking tot het 2022 model weer iets lichter geworden waardoor de kite weer een stukje sneller en wendbaarder geworden is dit jaar. Ook geeft de Orbit hierdoor extra lift en zie je ze hierdoor regelmatig in het Woo en Surfr klassement verschijnen.

Kortom dit is de kite om de dikke wind dagen mee te overleven!

Ook leverbaar met North Navigator bar en/ of pomp.

Vandaag besteld, Morgen in huis!.

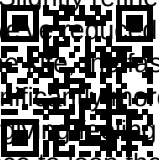

Beschrijving

Committing to overpowered airs and megaloops in gusty conditions demands an unwavering trust in your kite. Our iconic premier 5-strut kite delivers incredible top-end control and allows you to hold down more power than any other kite per square metre. Big jumps. Big hang time. Big wind range. The Orbit rockets you upwind fast, with effortless steering, extreme boosting and hangtime guaranteed to take your breath away. Without changing the DNA of the kite, we've engineered it to feel smoother, lighter, faster, and even more predictable in the unpredictable. At North, we understand what riders want in a performance, big air kite. For 2023 the Orbit feels even more responsive in all conditions. We've made small structural refinements to smooth out the canopy, optimizing the profile for less drag, faster forward speed and smoother

turning. Slightly refined bridling means the kite feels more stable and forgiving in overpowered, gusty conditions yet retains its ability to fly forward and catch you in kite loops. We've refined the kite's wing weight with the new bladder, the new sizes and wing plan, a new canopy material, new internal reinforcement, the trailing edge, the bridle, the line, the master the second line more robust lines, and the lines you jump. We've constructed the leading edges, the lines in our latest, more Dacron, have significantly more weight with a compromising strength or durability. We've also introduced two extra layer pressure points so you can release from any point more forward positioned in crucial moments through the direct line with short, direct travel. We've also made the new fourth set of lines so you the confidence to loop the kite even lower. It is ideal for heavier riders on smaller kites and boosts wingtip support on those crazy 40knot + days. Tested by nature, proven on the podium. The Orbit has your back when the rules of gravity count.
