

North Orbit 2023 7 meter Rood (1.559 EUR)

Locatie **Noord-Holland, De Cocksdorp**
<https://www.advertentiax.nl/x-1466556-z>

Te koop aangeboden:

Ben jij opzoek naar een van de beste big air/kiteloopt kites van het moment!?

De North orbit 2023 is in vergelijking tot het 2022 model weer iets lichter geworden waardoor de kite weer een stukje sneller en wendbaarder geworden is dit jaar. Ook geeft de Orbit hierdoor extra lift en zie je ze hierdoor regelmatig in het Woo en Surfr klassement verschijnen.

Kortom dit is de kite om de dikke wind dagen mee te overleven!

Ook leverbaar met North Navigator bar en/ of pomp.

Vandaag besteld, Morgen geleverd.

Beschrijving

Committing to overpowered airs and megaloops in gusty conditions demands an unwavering trust in your kite. Our iconic premier 5-strut kite delivers incredible top-end control and allows you to hold down more power than any other kite per square metre. Big jumps. Big hang time. Big wind range. The Orbit rockets you upwind fast, with effortless steering, extreme boosting and hangtime guaranteed to take your breath away. Without changing the DNA of the kite, we've engineered it to feel smoother, lighter, faster, and even more predictable in the unpredictable. At North, we understand what riders want in a performance, big air kite. For 2023 the Orbit feels even more responsive in all conditions. We've made small structural refinements to smooth out the canopy, optimizing the profile for less drag, faster forward speed and smoother turning. Slightly refined bridling means the kite feels more stable and forgiving in overpowered, gusty conditions yet retains its ability to fly forward and catch you in kite loops. We've added to the kite's weight and the ladder's size and added a new, baby-matching element to the leading edge. Enter the Orbit, master the leading edge, and the kite you jump. We've constructed the leading edge in our new Pure Dacron. We've significantly reduced the weight without compromising strength or durability. We've also introduced two additional bar pressure points so you can move from a light, more forward position in cruise mode right through to a direct, powerful short recovery travel mode. The fourth set of points give you the confidence to loop the kite even lower. It is ideal for heavier riders on smaller kites and boosts wingtip support on those crazy 40knot+ days. Tested by nature, proven on the podium. The Orbit has your back when the rules of gravity don't apply.
