

Project Engineer Manager

Locatie **Zeeland, Terneuzen**
<https://www.advertentiax.nl/x-1479997-z>

For a chemical multinational, located in the Netherlands, we are hiring a Project Engineer Manager

Bedrijfsomschrijving

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry. We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

You can join the largest overall construction project undertaken by INEOS, and one of the largest petrochemical projects in Northern Europe in decades. INEOS Olefins Belgium are establishing a world-scale Cracker in the Antwerp area. The project has been named "Project ONE". The plant is planned to come on-line around 2026.

Location: Antwerp | Duration: + 4 years

Project One will be managed by an Integrated Program Management Team (IPMT) which consist of Ineos and Program Management Contractor engineers, and 4 Project Delivery Teams (Pillars), which will manage the work scopes and EPC contractors.

providing oversight and guidance, ensuring that all work satisfies Project One specifications and standards. Oversee the work of the Document Controllers and the document flow from contractors, vendors, and other stakeholders to the Project Delivery Team and vice versa to support the project progress and quality requirements.

Functie-eisen

Specific Role Requirements:

Degree qualified and chartered or equivalent in appropriate engineering discipline. More than 15 years' experience in Engineering role in Oil and gas or Petrochemical setting. Operations experience would be a significant advantage. Seasoned and experienced Engineer. Work will be based in Contractor's office but occasional travel to other locations in Europe will be required.

In general:

Excellent team player. Strong interpersonal, communication and influencing skills. Strong planning and organizing ability. Highly motivated, achievement oriented. Ability to interface effectively with people of all levels, both internal and third parties, and with wide ranging cultural backgrounds. Able to define and prioritize issues and then solve the problems through networking with other team members or external sources. Innovative, with an eye for identifying opportunities to reduce costs and challenge the status quo. Good understanding of business drivers and ability to align design philosophies. Broad estimating skills and practical understanding of costs (capital, operating, life cycle). Willing and flexible to travel. Good verbal and written communication skills in English.

Preferrable:

Major project experience with strong design engineering/procurement background and a broad understanding of multiple disciplines and their interfaces. Proven track record of delivering leading SHE performance. Experience of supervising work in a Contractor's Design Office. Experience of field engineering and/or construction on a major Construction Site.
