V-Factor Charging System for Big Twin - 17833

These systems are the perfect choice when building a bike from scratch or when upgrading your weaker charging system. The alternator rotors feature fully encased sets of magnets that have no way of working loose like the OEM rotors are known to do. Instead of having just six long magnets like OEM rotors, these rotors have 12 short magnets to match the number of laminated windings found on the stators. 32 amp system. All systems include a chrome plated regulator/rectifier.
