

Installation Engineer

Locatie **Zuid-Holland, Leiden**
<https://www.advertentiax.nl/x-1485509-z>

Are you interested in working on big wind energy projects within a team of engineers? Do you have a couple of years of experience as an Installation Engineer within the Maritime & Offshore world? Take a look at our vacancy for an Installation Engineer!

Bedrijfsomschrijving

Our client is a worldwide and leading player in the Maritime & Offshore field. They work in transportation, installation and dismantling of heavy offshore constructions, like drilling platforms and windmills. Using large transport vessels they operate in areas that are increasingly challenging to access.

Functieomschrijving

For this client we are looking for an Installation Engineer, initially in the field of wind energy generation. You will be responsible for the preparations of big offshore projects, like heavy lift installations or the removal of these installations.

Your daily activities as an Installation Engineer will be:

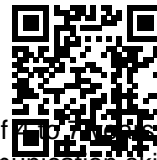

An interface role between the Structural Engineers and Marine Engineers to exchange all the necessary information, on equipment and ensure efficiency
 Presence at meetings with clients to collect all their specifications and wishes and help translate those into a clear scope of work
 Reporting to the Project Engineer
 Transforming the gathered information into procedures
 Writing the manuals needed for the execution of the offshore project
 Fulfilling an important role during the simulations of projects and responsible for the feedback of the results

Functie-eisen

The ideal candidate for an Installation Engineer includes the following:
 Bachelor's or Master's degree in Civil Engineering, Maritime Engineering or Mechanical Engineering
 A minimum of two years of experience in project preparation and the execution of offshore projects
 Good analytical, practical and pragmatical skills
 Excellent communication skills in English, both written and spoken
 Supervisory skills to guide the less experienced engineers
 Interest in temporarily working offshore during the project execution
 A valid work permit and/or living in the Netherlands is required for this position

Arbeidsvoorwaarden
