Hello there!

I'm selling this gaming PC because I have recently bought a laptop as a replacement. It is a mid to low-end PC, but runs titles like CS:GO, Modern Warfare 2019 and Valorant smoothly above 100 frames (depending on settings). The Computer has a fresh install of Windows 10. I'm also including a 21.5 inch monitor and more (check extras below). It is all set up and ready for use, however you will need a keyboard! The package also includes an RGB controller (small black box on the front) with tons of colors and settings for the case and the light strips. The controller and the strips are using magnets for mounting.

Specs:

- Ryzen 7 1700X 3.4 (3.8) GHz with dedicated be quiet! cooler.
- 8GB XFX Radeon RX 580 GTS
- Asus Prime B450M-A AMD B450 So.AM4 Dual Channel DDR4 mATX motherboard
- 2x8 GB DDR4 3000 MHz RAM
- 2TB + 240 GB SSD, and an old 500 GB HDD
- 600 Watt 80+ Bronze PSU
- AZZA Apollo White ATX Mid-Tower Case
- 6x Fans (1 RGB)
- external RGB controller incl.

- Windows 10 installed

- 21.5 inch ASUS Monitor with DVI cable
- 1000x RGB controller with 2x45cm light strips
- Mouse with simple RGB
- HPLink Wifi adapter
- Webcam (with loose contact, prone to disconnect if moved)

I'm asking for around €750 based on similar products on here and personal.
