A very loved and looked after Apple Monitor. Undamaged, and unscratched with no dead pixels. Colour reproduction is superb and clear. Has a power cable, and a mini display connector for older MacBooks (2010 - 2019). With the mini display to USB C adapter (thunderbolt adapter) it can happily connect to all modern MacBooks and Mac Minis. It has a built in charger for older MacBooks with a MagSafe charger (also with an adapter for MagSafe 1 and 2 connections). Normal use can be seen - no damage otherwise.

You can see some damage to the display cable. This is only only on the plastic outer casing and not to the internal wire itself. I have repaired it with specialist rubber tape and it has been as good as the original cable.

Need to sell as I have downsized my work area and so don't have space for an external monitor anymore.

Please only serious.
