

Piewiet 700 Zeilboot 7m 23 ft with Cabin inboard diesel engi (3.900 EUR)

Locatie **Flevoland, Lelystad**
<https://www.advertentieX.nl/x-1534109-z>

I am selling my sailing boat model 'Piewiet 700' from the Dutch manufacturer 'van der Rest'.
 I only bought the boat myself in 2020. Unfortunately, however, I don't have the time (anymore) to use it and take care of it properly.

The boat has been in winter storage ashore in Lelystad / NL since 2021. I have a very nice berth for the boat in Lelystad on the IJsselmeer, which has already been paid for up to spring 2024 and can be taken over by the buyer.

The berth has a side bridge and well-kept sanitary facilities not far away (see pictures from 2021).

!!!

I am currently planning to be in Lelystad on Saturday 20/05/2023. A viewing would then be possible.

!!!

Technical specifications:

Type: Piewiet 700, vd. Rest Nautic

Year 1978

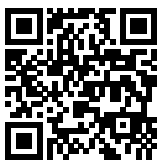

Length: about 7m

Width: approx. 2.50 m

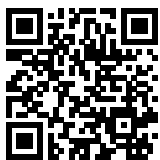

Draft: approx. 1.20 m

 Piewiet 700 Zeilboot 7m 23 ft
 with Cabin inboard diesel engi

Length: approx. 7.18m
 Standard weight sailboat approx. 1.80m
 Inboard Diesel Farymann type L30M approx. 6kW / 8 HP
 Farymann engines are made in Germany and are known for their reliability and robustness.
 The 8 hp may sound like little, but they are enough for the boat. Maximum speed approx. 4-5 knots, 6 knots possible as top speed.
 However, the engine was always treated gently by me.

Sails:

Mainsail: approx. 10 square meters
Jib: approx. 10 square meters
Storm jib: approx. 6 square meters

Equipment/accessories:

- Sails (main, jib, storm jib)
- Manually adjustable "kicker" (V2A) as boom support and boom vang
- Roof hatch in the fore berth area
- 4 beds (2 in front cabin, 2 (very large) in the main cabin)
- device to lay the mast
- wooden bracket for the laid mast, that can be built up
- sea toilet (never used by me, valves should be renewed)
- table for indoor use, that can be built up
- exterior table for cockpit, that can be built up
- Small kitchen with electric stove and sink
- Fresh water tank (drained, not used by me, should be cleaned)
- Stainless steel pulpit and stern pulpit
- Swimming ladder made of stainless steel, foldable
- Interior LED spotlights
- CD radio
- Teak floor gratings in cockpit
- Teak handrails
- Top and bow light
- Shore power connection prepared

It is a stable boat designed and built in the Netherlands for the inland seas there (e.g. IJsselmeer). The quality of the workmanship is very high, it was built in the high quality hand-laid fibre glass process. The high proportion of ballast of around 800kg (corresponds to around 50% of the total weight) ensures stability and safety.

Of course, with a 1978 boat like this, there are a few things to take care of. In general, however, the boat would be technically ready to sail. I had the engine serviced every year.

Since it has been on land for a year now, it would also need a little care (wash thoroughly and polish if necessary). Antifouling should be renewed. The most recent pictures I currently have are from October 22.

I am selling the boat as is. Due to time constraints, no test drive is possible, but I can therefore accommodate something with the price.

However, I will of course provide information about the defects known to me to the best of my knowledge. Again, the boat is afaiik technically ready for use, no soft spots on the hull.

I'm selling it to keep it that way. Unfortunately I don't have the time myself.

I have some videos on Youtube (motor running and boat in the crane). Feel free to contact me for the links.

I speak English and German. I might understand a little Dutch, but I'm sorry, i guess it wouldn't be enough to.
