Met docking station.

Perfect working and touch is also working fine.

In 2020 had to change the diode of laptop and since then see pic 6 on left right edges mildly visible display issue majorly on white background but as it didn't bother me in any working functionality I didn't get it repaired and also don't think it is required.

It is coming with 2 chargers one can be in living room and other can be in working area also with docking station see pics for port details.

Basically a touchscreen working tablet-laptop 13.5inch screen with docking station and 2 chargers.

Reason for selling - Got Macbook in job so basically not using.
