### Impulse Foils

Created in collaboration with Cloud IX surf foils the Impulse wing set confidently crosses kite, surf and wake hydrofoiling. Designed to provide rapid lift and long glide, along with a wide speed and wind range. The Impulse will take your freeride kite hydrofoiling to the next level. Allowing more time for tack and gybe transitions, constant wing engagement on jump landings, and the ability to drop a size kite or get out in even lighter wind conditions than ever imagined. These same design attributes make the Impulse ideal for mounting on a hydrofoil compatible SUP or prone surfboard. Efficient and smooth controlled lift, along with the ability to generate glide by pumping the wing, keeps swell energy connectivity easy and manageable. This magic can be translated behind the boat where the Impulse excels at sustained hydrofoiling on both the primary and secondary wakes with or without the rope!

1x Rocket Full Board -Liquid Force

1x Standard Impulse set size - Liquid Force

Mast Length: 94.8cm alloy 2480g

Fuselage Length: 76cm carbon with 2 position rear wing options 540g

Impulse Wing Set: 1400g (with variance)

Total Unit Weight: 4420 (with variance)

1x Short mast Impulse set size - Liquid Force

Mast Length: 60cm alloy

Fuselage Length: 76cm carbon with 2 position rear wing options 540g

Impulse Wing Set: 1400g (with variance)

Total Unit Weight: 4420 (with variance)

### Technical Data

Rider level Intermediate - Advanced  
 Comfort zone speed 2-18 miles/h  
 Low end lift speed 5 miles/h  
 Top end speed 24 miles
