De ideale kite voor vakantiedagen met minder wind! Zonder bar. Er zit een Naish conversie pakketje met twee lijnen bij. Ik heb die gebruikt om met een slingshot bar te varen. Dat werkt prima!

Naish site: The Fly was designed for freeriding and freestyle in light to marginal wind conditions. It is exceptionally lightweight for its size and has amazing low-end power. This is primarily due to the Fly's proven two-strut, easy-handling design, which also provides superior turning and control. The Fly utilizes swept back wingtip shaping, which improves water relaunching in light wind conditions.

The Fly idea came from the idea that riding in light wind should be fun. Just because the wind is light, you shouldn't necessarily have to use a kite designed for racing, so we created the Fly as a fast turning, lightweight and fun to ride kite in the lowest of wind.
