I'm selling my laptop that I got 27.08.2022

The laptop does include the original box, charger and second drive plug.

The reason for selling is because I got a new desktop PC.

The laptop was just used as gaming desktop and never taken anywhere else than my desk. I used external keyboard, mouse and monitor, so everything is in perfect condition.

I upgraded it from 8GB ram, to 32GB 3200MHz ram from corsair.

It also has activated Windows 11, since I got it from MediaMarkt.

Another upgrade is the thermal paste, to the best performing Thermal Grizzly Kryonaut Extreme. That did improve the thermals by a lot.

For any futher questions, feel free to.
