Introduction to the job For ASML data is an asset which has an increasing business value and which we need to protect and properly manage. Therefore managing our data assets becomes increasingly important. Do you like to lead the transformation towards the data mesh principles? Do you like to structure, define and model data landscapes, and are you able to use your skills in a very dynamical and high-tech business environment? Are you capable to work multi-disciplinary with various stakeholders (e.g. business leaders, analytical leaders, projects leads, business process owners, IT-managers) to secure the consistency within ASML? Then we are looking for you! Role and responsibilities Your mission is to successfully guide the change (activities) to mature ASML in the area of data & information management. In this role you are responsible for shaping, owning and leading the implementing the roadmap through alignment with various ASML sectors and business lines. You are able to understand which data is most critical to ASML's success and ensure it gets prioritized in the roadmap. To do this effectively, you understand ASML's most important priorities and what data is needed to achieve ASML's strategic goals. In doing so you are helping the business to move towards the availability of trustworthy information products to realize our objectives. Linked to the roadmap, you are responsible for cross-ASML alignment by supporting in the preparation for several information management governance bodies. These bodies, consisting of senior director and Sr. Management representatives, play a key role in the budgeting, prioritization and commitment that is required for successful delivery of the roadmap. You are a very capable stakeholder management who can create enthusiasm and get commitment your plans, through effective communication and preparation. By acting as a true ambassador you will lead a cultural change of ASML's awareness on the importance of data. By elevating awareness and educate business stakeholders, you will make sure data gets recognized as one of ASML's key assets. Apart from roadmap and governance, as a consultant you are on top of any missing element needed for success. Anything ranging from communication strategy, to process templates, to education, that can be improved or developed, you are the person to observe the gap, propose adjustments and drive implementation. In this role you own the entire picture covering all activities required for such a large-scale corporate-wide implementation. Next to tactical and strategical thinking, you lead a growing team which helps the organization to kick-start the actual delivery of trusted information products. This is done by engaging stakeholders and creating working groups with subject matter experts, guiding various groups of people simultaneously delivering trusted information products in different domains, of which its details will be properly registered and approved in our ASML Data Governance Center. As a result, you will gain in-depth experience in different areas and data domains across ASML, while shaping an extensive ASML network. The team The CDO ambition is to ensure availability of high quality and trusted data for ASML management, employees and customers. By

treating data as a valuable asset, we are able to unlock its value for ASML and increasing our revenue, realizing operational excellence and protecting our company. The CDO office is a fully positioned within IT and is an established cross-ASML-wide organization. The organization is mandated to lead the data landscape including information governance and cross-cutting data architecture. The organization in CDO is a strategic, open, agile, data-driven organization. What do you want to do? You should have a T-shaped competence profile in which you are able to combine your business services provided by ASML with your understanding of the underlying technology. You should be able to understand the vision and requirements of business, and translate them to a technology solution. You are far from shy in leading your team and the organization well as the technology environment. You are able to structure your ideas and findings, and present tangible strategic and improvement proposals. Education and experience It is key to have the following experiences: 10+ years relevant experience, preferably in (strategic) consulting, within relevant domains such as Data Management, Data Governance, Information Management, Trusted Data, Data Mesh, Enterprise digitization, or other related domains. Knowledge about both business and well as the technical data domain is key (T-shaped profile). Academic (or experienced) Bachelor degree e.g. Business administration, Business Information Management, Data- and Computer Science, Econometrics, or other relevant domains. A background in assurance roles (e.g. RE, RC, RA) is value. Any experience in your working past with MS Azure, SAP Hana Cloud or Hadoop is appreciated. Skills Working at the cutting edge of tech, you'll always have new challenges and new problems to solve and working together is the only way to do that. You won't work in a silo. Instead, you'll be part of a creative, dynamic work environment where you'll collaborate with
