The Galaxy S23 Ultra (5G) from Samsung is a very stylish smartphone. That starts with the sustainably designed housing with aluminum frame. This also has a premium look and is partly equipped with eco-friendly materials. On top of that rests a scratch and impact resistant 6.8-inch display with Quad HD resolution and Dynamic AMOLED X2 technology. Photos, videos, games or apps: everything you view or use on it, you see in the right colors. Even when the sun shines brightly, because Vision Booster ensures that the screen continues to display everything clearly. Furthermore, thanks to its 120Hz refresh rate, the S23 Ultra is also very suitable for gaming. The integrated S Pen is the finishing touch to make your Galaxy S smartphone even easier to.
