2021 Mitsubishi Space Star 1.2 Cool+
 This is a very economical car, with a stylish exterior, perfect for cruising in the city or short trips. It is practically new with only 8000km on the stand, it comes with APK valid until January 2025 & no service is required until January 2025 or 30k mileage.

The interior is as new, just as the exterior - this is essentially a new car without the price of one! It has very low maintenance costs and environmental impact, and it is very fuel efficient. You can easily pair your phone using bluetooth or USB or AUX cable with the car's audio system to listen to your favorite tunes while cruising, it also has access to DAB radio. Just take and drive!

Sound interesting?
 I am a private owner, price is negotiable. Contact for more.
