I am selling a very good gaming PC . I used it for video editing , but I am switching to a laptop and thus don't need the PC anymore. Nevertheless, I was always very satisfied with the performance of this machine. Perfect for video games, photo , and video editing, other kinds of professional use , etc. Very elegant and sharp looking, fast , and with a lot of disk space and memory .

Spec:

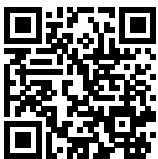

GPU : Palit GeForce GTX 1060 JetStream 6GB GDDR5 (with RGB LEDs)
 CPU: AMD Ryzen 7 1700, 3GHz (never overclocked, with RGB LEDs on the cooling)
 MOBO : Asus PRIME X370-PRO (with RGB LEDs)
 RAM : 16GB G.Skill Ripjaws V DDR4 3000MHz CL15
 Power Supply : XFX TS 550W
 SSD : 128GB ADATA Ultimate SU800
 HDD : 2TB Toshiba P300
 Case : Modecom Oberon Glass Black

On top of that, I include a free keyboard :

Roccat Isku Illuminated Gaming with several macro keys, lighting levels, the possibility to create different settings profiles, and useful function keys. Very big and comfortable.
