We are looking for someone who is passionate about software development!Are you interested in contributing to our goal of becoming the world leader in software for public transport operators? Would you like to work at a dynamic and innovative organization whose software is utilized globally? If so, this is the perfect job opportunity for you!

Sqills, part of Siemens Mobility business unit Software, is a leading technology company focused on providing innovative solutions for the public transport industry. With a commitment to excellence, we are dedicated to improving the passenger experience and increasing operational efficiency for our clients across the globe.
We share one common goal: enhancing the passenger experience with our combined power for the future of Mobility.Siemens is operating a Software Development Center in Aveiro targeting Intelligent Solutions for the future of Mobility. We want YOU to join our team in the capacity stack Developer (m/f/d) Mobility Business.

Sqills is a multinational IT software company located in Europe.
We are looking for a Full Stack Developer for our software development teams.
The ideal candidate will work in multinational projects with headquarters
located in the Netherlands. This team member will be responsible for design,
development, troubleshooting of the software and also automating the process of
infrastructure changes to ensure proper transition starting in a development
environment and migrating up into the production environment.
