The role reports to the Project Delivery Team Engineering Manager. The role responsibilities include:

FEED Study Role:

To support the Project Delivery Team Engineering Manager in the performance of his/her duties, deputising as required. Work closely with the Feed Contractor to ensure that all Civil Engineering issues are properly resolved in a timely manner, that design changes are managed correctly, and that the facilities comply with all Project one and statutory requirements and Stakeholder expectations. Monitor all Civil Engineering design and procurement work performed by the FEED Contractors and other third party designers/vendors, providing oversight and guidance, ensuring that all work satisfies Project One specifications and standards. Ensure detailed review of all FEED Contractors' and vendor systems, processes and procedures, including PEPs, Quality Plans, etc for Civil aspects. Provide Project One Civil Engineering input into the preparation, review and approval of Procurement procedures, the Project Supplier List, contractor/vendor pre-qualification, Purchase Requisitions, Invitations to Tender, etc. Provide Project One Civil Engineering input into tender clarification/evaluation, contractor/vendor selection and contract/purchase order negotiation and placement, ensuring all activities are carried out in accordance with the company Code of Conduct. Lead audits related to the Civil discipline of the FEED contractors and support audits from outside parties.

EPC Role:

Responsibilities generally as above (but now related to working with the EPC Contractor) Ensure the facilities are designed, built and commissioned in compliance with all relevant statutory and Project One regulations. Support the EPC Contractor and vendors to develop fit-for-purpose ITPs for equipment, packages and bulk material supply, auditing vendor compliance as required. Support the EPC Contractor to develop fit-for-purpose ITPs for fabrication and construction, auditing contractor compliance as required. Monitor vendor performance on all Civil Engineering matters, ensuring shop technical queries are resolved in a proper and timely manner, visiting vendor shops as appropriate. Support the QA Manager in resolving Civil Engineering non-conformances, concession requests, etc. Liaise closely with the EPC Contractor personnel at the Module Fabrication Yard(s) and Construction Site on all Civil Engineering matters, ensuring yard/field technical queries are resolved in a proper and timely manner. Work with the project Civil engineer to ensure that all module fabrication and construction work, system Completions and Handover, punchlisting, ensuring that all Civil Engineering work satisfies Project One specifications and standards. Support precommissioning and commissioning, etc. as required. Manage the relevant interface(s) with company stakeholders, ensuring the operations function is well prepared for eventual project ownership, including the timely handover of the agreed Civil Engineering deliverables to support training, operations and maintainance procedure development, Maintaiance Managment System population, etc.

Functie-eisen

Degree qualified and chartered or equivalent in appropriate engineering discipline. More than 15 years' experience in Engineering role in Oil and gas or Petrochemical setting. Operations experience would be a significant advantage. Seasoned and experienced Engineer. Sound knowledge of key discipline areas including: Belgium Civil regulations and laws. Roles and Responsibilities of Notifiable Bodies, and their equivalent.

Arbeidsvoorwaarden
