Job in Germany Junior Software Engineer (mwd)

Locatie **Gelderland, Putten**
https://www.advertentiex.nl/x-1585289-z

Where we stand Informaticon specializes in customizable business software for medium-sized companies. Informaticon Deutschland GmbH is a growing company with twelve employees and serves customers in the building materials and recycling industries. Thanks to the unique architecture of Informaticon business software, individual customizations can be made per customer and innovative processes can be realized across platforms. At Informaticon, applications are developed in an agile manner and the project organization is adapted to the size and complexity of the projects. Junior Software Engineer (m/f/d)% / Neu-Ulm Use your programming skills to drive the success of mid-sized companies. As a Junior Software Engineer, you will work in a team of around four software developers. Depending on the size of the order, you will program extensions and adaptations to the business software independently or be part of a project team. Your tasks range from requirement engineering and programming solutions to project coordination and support of key users. Due to the different activities, your daily work will be varied. In addition to working in the office, you will also be on-site with customers, where you can experience first-hand the effects of your work. With your work, you enable our customers to work efficiently and successfully master the challenges of digitalization. In doing so, you will work closely with the ERP end-users to find the most sensible solution together. What we expect Enjoyment of direct customer contact You put yourself in our customers' shoes and make their challenges your own. Good performance in STEM subjects You're gifted at abstract thinking and can think through complex issues. PowerBuilder Development You are motivated to learn the PowerBuilder object-oriented development environment and become familiar with the architecture of ERP software. Qualifications Degree in computer science, media informatics, business informatics or electrical engineering. We are also open to graduates who have studied mathematics or physics. What awaits you Together, we are successful because we value each individual's personality and use their strengths. We have high expectations of ourselves, depend on each other and give talents a free workplace. We adapt in addition to the bottleneck tasks and are so convinced of ourselves that we also find the best sensible solution. At this place, we are happy to adapt customer wishes. In everything we do, we help and support each other. Contact Informaticon Germany Ltd. Fabian Engler Tower StreetNeu-Ulm jobsinformaticon.com Learn more Do you feel like you're in the right place?
