

Saga Integrator

Locatie **Gelderland, Putten**
<https://www.advertentiax.nl/x-1586658-z>

Functieomschrijving As a Saga Integrator you are energetic and have a passion for smart thinking and taking action. Questions don't scare you. You are curious, like to learn and solve problems. You have a proven track record in organising, designing and continuously improving processes, data, data quality and applications for Financial and Risk Reporting. Together with your colleagues, you decide the way of working within your expertise; you share specific knowledge, divide the areas and set standards. You are part of a multi disciplinary team consisting of Business and IT (referred to as 'block') to achieve goals within your cluster (referred to as 'GRID'). With everything you do, the focus is on serving the interests of our internal and external stakeholders. We optimise within the framework provided by Legislation and banks Strategy. Within Finance and Risk this implies implementing Regulatory prescribed Financial and Risk Reporting in the best way possible, improving the (data) architecture, and data quality. Also, we contribute to realise the future Finance and Risk landscape so that we continuously improve the speed with which we can respond to requests from our Business stakeholders and Regulators. It is a widely defined role. Dependent on your specific assignment, your role can vary between generic coordinating and in-depth specialisation. As a Saga Integrator, you are concerned with the consultancy questions around data, data models, the reports and IT processes. You innovate, advise, improve, train, trouble-shoot, and implement. Together with your team, you are the experts on data requirements for Finance & Risk Reporting. You reach your objectives by bringing your specialty and pursuing active cooperation with professionals from business and IT. Your autonomous way of working in an Agile environment is key to your success. Functie-eisen Living in the Netherlands (Dutch speaking) Education at academic level (HBO or University) Have 8-10 years of relevant industry experience Be knowledgeable on Finance/Risk and reporting processes Have experience in enterprise data platform design, data ingestion, and data integration (transformation) Have experience in conceptual, logical and physical data modelling Have affinity and experience in the designing and implementing of processes, IT and data management Arbeidsvoorwaarden Imagine yourself working at a company that truly cares about its employees. A company that strives not only for profit maximization but also for providing good working conditions to its workers. A company that takes into account your personal situation and capabilities. At this company, there is a maximum salary of €6,800 . This means that you can trust that you won't be underpaid while still having ample room for personal growth and development. Additionally, there is a remote work budget of up to €750 , allowing you to create a comfortable and productive work environment at home. You have the freedom to work where and when it suits you best. But that's not all. There is also a study budget of €3,500 available . With this, you can further enhance your knowledge and skills, giving your career a significant boost. This way, the company invests not only in your well-being but also in your future prospects. Furthermore, you

can count on receiving 8.33% holiday pay each year and having 25 vacation days. This means you have enough time to relax and recharge, enabling you to return to work refreshed. If you have any questions, please contact us via the contact details below. We are looking for motivated professionals who can trust their employer, invest their heart and soul in their work, and are committed to providing a well-being and development for their colleagues. What are you waiting for? Apply now and experience firsthand what it's like to work in a great environment. Website: <https://www.advertentiax.nl/x-1586658-z>
