 Introductie  
 Looking for a C++ Software Engineer job in Nijmegen region? Join our client's Software team, developing software in an object-oriented way. Collaborate with system engineers, architects and use Scrum/Agile to improve the Software Architecture of our client.  
 Functieomschrijving  
 As a C++ Software Engineer in the Nijmegen region, you'll be responsible for developing software in an object-oriented way, working closely with the Software team at our client, a fast and dynamic technical company. You'll contribute to the development of the software platform of the machine, working in a Scrum/Agile way of working. In this role, you'll work closely with your stakeholders, including system engineers, to agree on system specifications realized in software. You'll also interact with architects to review designs and contribute to the improvement of the Software Architecture of our client. Overall, you'll be end-to-end responsible for the realization of software in C++ in the software department. This is a great opportunity for a Software Professional with experience in C++ development looking to join a talented and dynamic team in the Nijmegen regio  
 Wat verwachten we van jou? Skills:
