Would you like to take part in transforming healthcare? Qbtech is the global market leader in professional ADHD tests, providing tests that are both CE marked and FDA cleared for use as an aid in the assessment and treatment evaluation of ADHD for people age 6-60. Our vision is to transform healthcare by providing a complete system of leading objective tests, products and services that empowers clinical and financial decision-makers to improve outcomes and support patients to better understand their symptoms and treatment.

Qbtech is present in 14 countries with offices in Stockholm, London and Houston. At Qbtech we are on a mission to Transform ADHD Care and help those with ADHD to thrive. So far, we have helped more than 500,000 people in 11 countries. Qbtech is the global leader in objective tests for ADHD. With CE marking, 3 FDA clearances, strong brand names and effective collaborations with research institutes we are growing fast.

We are looking for a commercially minded Clinical Psychologist (basispsycholoog) or orthopedagoog to expand, advise and support our rapidly growing customer base. The clinical advisors are a fundamental part of our company and are one of the reasons our customers love what we do.

About the Role

The Clinical Advisor will be responsible for our growth in the Netherlands within the ADHD assessment market and developing new opportunities for Qbtech products. Key tasks include 1). Supporting the

clinical adoption of QbTest/QbCheck through training clinicians on how to administer and interpret the tests, 2). Assessing the market for new products and providing advice on new products, 3). Supporting the Qbtech team to clinicians that have expressed interest in our products, 4). Identifying and maximizing opportunities for growth, working in collaboration with sales and marketing teams to maximize our impact on the market, 5). Your core responsibilities are to take advantage of the opportunities that rapid growth can bring – apply today.

Essential Duties and Responsibilities
 - Training and certifying clinicians on appropriate access to reports, data entry of patient information, quality assurance checks, interpretation of clinical reports
 - Providing product demonstrations and following up sales enquiries
 - Analysing customer usage reports to determine opportunities for improving clinical efficiency
 - Accountable growth within the Netherlands
 - Who are You? Be passionate about helping children and adults with ADHD
 - Be focused on results
 - Have strong presentation and training skills including adaptability to various professional environments
 - Have exceptional organizational
