Boxmeer, Fulltime (Remote work possible)

Are you ready to take on a vital role as a Technical Engineer within Nutreco's Global IT Services (GITS) team? Do you have what it takes to lead and organize global processes to ensure the optimal functioning of our internal server product across our 160 locations worldwide? Are you eager to oversee their maintenance, scalability, and updates while actively contributing to other projects within the team?

As a Technical Engineer, you will be part of the GITS Infrastructure team. The team manages 160 locations with Data Center, Network and Server solutions worldwide. Your role involves leading and organizing global processes to ensure the server product is fully functional and meet expected parameters. You will manage and oversee the implementation, replacement, maintenance, scalability, and updates. Additionally, you will actively contribute to global and local projects.

This position presents an excellent opportunity to work within a global organization, serving as a crucial link between business operations and our global solutions. The Global IT Services (GITS) team plays a pivotal role in Nutreco, overseeing the management of the global IT infrastructure and datacenter solutions.

What are your key accountabilities? Oversee vendor services for the internal server product. Collaborate with internal stakeholders to assess server needs, discuss upgrades or replacements. Create and maintain local server product. Implement effective cybersecurity measures to manage and mitigate risks. You are one of the knowledge owners for the infrastructure team, ensuring standards are set and implemented. Where needed, you will provide knowledge to our suppliers and act as a sparring partner for suppliers, the business, and your GITS colleagues.

What we offer

As Nutreco, our mission is 'feeding the future'. In a world with limited natural resources, our ambition is to meet the rising food needs of a growing world population in a sustainable manner. Working for Nutreco means an impactful role in an international, dynamic environment with complex and diverse topics. We offer you the opportunity to grow professionally, within Nutreco and the broader SHV group. Nutreco belongs to the SHV Family with more than 60,000 employees. In this role you

work together with C&B and Global mobility experts across SHV.

What else is in it for you? We offer you a fulfilling career position. As a full-time employee, you will receive a competitive salary package, including a solid pension scheme. You will also receive a vacation package, including the possibility to take or purchase additional number of days. You will receive the opportunity to grow within Nutreco and the broader SHV group. You will be involved in projects around the world. Flexible working environment, with the option to work from home several days per week.

You exhibit leadership abilities and excel at collaborating within a team. You have a knack for effectively handling multiple projects that have competing priorities and involve diverse stakeholders. As a detail-oriented and communicative individual, you pay meticulous attention to detail. You can establish strong relationships and partnerships with stakeholders across the entire business and beyond. Your focus is on achieving results, and you actively demonstrate initiative. Given the complexity of the working environment, you don't approach issues in isolation; instead, you connect the dots and have a holistic view of the bigger picture. What you bring: Bachelor's Degree in an IT-related field, 8+ years of professional working experience with enterprise servers, in an international environment. Strong experience in vendor management. Knowledge of Windows Server, Active Directory, Azure Active Directory, Azure Resource Manager, Office 365 products, VMware, CommVault, VEEAM and StorMagic SvSAN. Analytical, project management experience, good organizing skills, flexibility and patience. Ability to present information in a
