Bedrijfsomschrijving ABOUT THE COMPANY

It is an AI start-up, focusing on automating vehicle inspections. They developed a gate that makes vehicle inspections effortless. After driving through the gate, a highly accurate damage report is waiting for you. The Lensor gate saves time and reduces costs. A full vehicle inspection in less than 10 seconds. Functionschrijving

Are you a creative and enthusiastic individual with a passion for data engineering? Then join the dynamic team as a Data Engineer and play a key role in bridging the gap between hardware, Al models, and the cloud. Your innovative mindset will be invaluable as you automate workflows, optimize data handling, and drive improvements in their cutting-edge product. If you thrive on challenges and love building innovative solutions, they have the perfect opportunity for you.

You will continuously improve and extend the existing solution by bringing new ideas to the table while keeping the customer's focus in mind. The small team and innovative nature of the project enable you to work on a diverse set of challenges.!

Your responsibilities Automating processes to streamline data flow Efficiently transferring and storing large volumes of data Designing robust software and data architectures Programming and implementing novel ideas Identifying and implementing improvements throughout the system Key Challenges As a Data Engineer at Lensor, you will encounter exciting challenges, including: Handling and processing massive amounts of data Enhancing system performance

Comparing and analyzing different inspections

Functie-eisenProficiency in data engineering tools and technologiesStrong problem-solving and analytical skillsExperience with automating workflows and optimizing processesKnowledge of software and data architecture principlesAbility to transform architectural designs into efficient codePassion for innovation and driving continuous
