Bedrijfsomschrijving
 ABOUT THE COMPANY

It is an AI start-up, focusing on automating vehicle inspections. They developed a gate that makes vehicle inspections effortless. After driving through the gate, a highly accurate damage report is waiting for you. The Lensor gate saves time and reduces costs. A full vehicle inspection in less than 10 seconds.

Functieomschrijving

Are you a creative and enthusiastic individual with a passion for data engineering? Then join the dynamic team as a Data Engineer and play a key role in bridging the gap between hardware, AI models, and the cloud. Your innovative mindset will be invaluable as you automate workflows, optimize data handling, and drive improvements in their cutting-edge product. If you thrive on challenges and love building innovative solutions, they have the perfect opportunity for you.

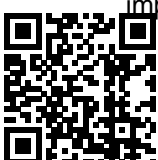

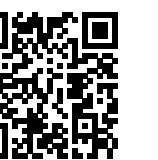

You will continuously improve and extend the existing solution by bringing new ideas to the table while keeping the customer's focus in mind. The small team and innovative nature of the project enable you to work on a diverse set of challenges!

Your responsibilities
 Automating processes to streamline data flow
 Efficiently transferring and storing large volumes of data
 Designing robust software and data architectures
 Programming and implementing novel ideas
 Identifying and implementing improvements throughout the system
 Key Challenges
 As a Data Engineer at Lensor, you will encounter exciting challenges, including:
 Handling and processing massive amounts of data
 Enhancing system performance

Comparing and analyzing different inspections

Functie-eisen
 Proficiency in data engineering tools and technologies
 Strong problem-solving and analytical skills
 Experience with automating workflows and optimizing processes
 Knowledge of software and data architecture principles
 Ability to transform architectural designs into efficient code
 Passion for innovation and driving continuous

improvement
