I bought this motorcycle new in 2017 in Switzerland and imported it to the Netherlands when I moved here. I was a complete beginner when I bought it and it was a perfect starter bike, ideal for the A2 license. It is quite nimble and forgiving. I'm selling it because I don't find the time to use it, as the very low number of kilometers shows. Someone else should enjoy it :)

It is in immaculate condition, apart from two minor scratches on the front wheel cover (see photo) and was always parked in a garage. The last maintenance was done about 1.5 years ago at a Honda dealer (see photo) and I've only driven 200 km since then.

The two soft removable side bags and the tank bag are included in the price. It comes with the two original keys, as well as the maintenance booklet (in German, French, and Italian) and manual (in French).

Feel free to get in touch for any questions or to discuss the price (within reason), preferably in English because my Dutch is not so:)
